Permanent water drain  
function

Timer function

---

**Stackable:** When the appliance is not in use, the top part of the unit can be placed in the collection tray in order to save storage space.

---

**Removable water container with water level indicator:** The water container can easily be removed.

---

**Possibility for permanent water drainage:** By fitting a flexible water drainage tube a continuous water discharge can be realized. If done correctly, it will prevent the need for emptying the water container.

---

**Full colour box:** The unit is delivered complete with auxiliary parts within a full coloured box, displaying the applications and operation information in several languages.

---

**24 hour timer:** The unit is equipped with a timer function which can switch off the unit at any hour.

---

**Large size, removable water tank:** For ease of use, the dehumidifier has an extremely large watertank capacity. The frequency of having to empty the tank is significantly reduced, with this large sized water tank.

---

**Hygrostat:** The humidity can be regulated via an adjustable hygrostat.

---

**Easy to use:** The device adapts to the room conditions. It alternates between silent and full power mode to maintain a humidity level of around 50%. When the water tank is full, an acoustic signal sounds and then the device switches off.
